

**Team Number:** 3

**Team Name:** The Mixifiers

**Team Members:**

Vikki Wong (viwo4708, [viwo4708@colorado.edu](mailto:viwo4708@colorado.edu)),  
Luke Sellmayer (luse9638, [luse9638@colorado.edu](mailto:luse9638@colorado.edu)),  
Justin Jamrowski (juja4571, [juja4571@colorado.edu](mailto:juja4571@colorado.edu)),  
Freddy Linn (frli5468, [frli5468@colorado.edu](mailto:frli5468@colorado.edu))  
Lillian Duarte (lidu5648, [lidu5648@colorado.edu](mailto:lidu5648@colorado.edu))

**Application Name:** Mixify

**Application Description:**

Mixify is a website that you can log into with your Spotify account. It works communally, so multiple people need to log into it. It stores everyone's 100 most listened to songs collected from the Spotify api-in a database. Then, you can put in your username and up to 9 other people's username in and see all the songs that everyone has in common - or the songs that the greatest number of people have in common with the count of people who have it if there's no one song everyone has in common.

If we have time to take the idea further, you will be able to add people's username as a friend on the website. Then there will be a song guessing page on the website where every day you see a random song taken from one of your friend's most listened to and you have to guess which friend the song came from.

**Vision Statement:** For Spotify users, who are curious what songs their friends love, Mixify is an app that lets you see what songs you and your friends are all listening to. Unlike Spotify itself, our product shows all songs you have in common with someone and creates a game.

**Communication Plan:** The collaboration tool our group will be using is a text message group chat along with Discord, which will allow us to send files easily and video chat/share our screen.

**Meeting Plan:**

Team Meeting:

Tuesdays at 4 - 5pm (in-person) at CSEL

Thursdays at 4:15 - 5:15pm (in-person) at CSEL

Weekly Meeting with Nikita: Tuesdays at 3:30pm on Zoom

**Wireframes:**
