

## Meeting with Nikita:

Minutes of Meeting: 3:30 pm - 3:42 pm

### **Need to do some catch-up on our .ejs pages for our website**

Start working on the front end (login and register pages):

- We will be testing during our lab

Add an extra meeting on the weekend?

At least by the lab Friday, have a table called users (username and password) to use our login and registers page, so we can push our website onto the cloud.

Look at lab 3 for steps to create branches instead of pushing to the main

## Team Meeting: Tuesday

Minutes of Meeting: 3:50 pm - 5:11 pm

Decisions made:

**We got to grind this week.**

Finishing up the .ejs files and the database

Alternative actions/options discussed:

Follow-up items (including agreed-on roles and responsibilities):

Vikki - Login page

Luke - Friends page

Fred - Mixify page

Justin - Register page

Lillian - Database

## Team Meeting: Thursday

Minutes of Meeting: 4:15 pm - 4:53 pm

Decisions made:

Finished the login/register page (linking with Spotify)

Finished the home page

Linked Spotify API

Finished Prospects page

Alternative actions/options discussed:

Working on our own time, then using the meetings as a time to work through the issues we were having individually

Follow Up items:

## Deliverables for the next weekly meeting with Nikita:

### **What have you done since the last meeting?**

We have working .ejs files for our website

Started to work on the database, and now we add users to the database and have worked on sending the database query results to the prospects page.

### **What are the challenges you are facing?**

We all had a busy week with other CS classes, so we could not put all our focus into this project as the other week.

### **What are the features you are planning to implement this week?**

We plan to have a full-functioning database

Uploading our site to the cloud server

Clean up some of our .ejs pages if we have the time, but the database is the main focus
